

Alessandro Tadei

Data Analyst - Scientist / Quantitative Researcher

Professional summary

- Quantitative researcher (PhD in Quantitative Psychology in early 2019) with 5+ years of experience in data analysis and application of modern machine learning techniques.
- Effective science communicator for diverse audiences with 600+ hours of teaching applied Frequentist and Bayesian Statistics and 10+ presentations in international conferences.
- Proven ability to meet tight deadlines by working in fast-paced work environments and extensive experience in multicultural teamwork.

Work experience

Researcher, PhD student, Åbo Akademi University 2013 – present

- Highly proficient in R, SPSS, Bayesian Networks, PostgreSQL, Tableau.
- First author in six research projects, entirely conducted from study design and data collection, to publication of the results.
- Developer of two highly accurate naïve Bayes classifiers to support Finnish police investigations, also cited by the [Finnish national media](#). User Experience tested and monitored.
- Mentor in statistics for peers and students since 2014.
- Winner of over 100,000€ in research grants, of the [3MT Coimbra Group Pitch Competition](#), and of the Edward Schaeffer Award for the Best Research Presentation in Atlanta (GA), USA.
- Responsible for Master level courses and specialization classes on the use of machine learning and Bayesian Networks in decision-making.

Lecturer and Tutor, United Nations 2015 – 2017

- 500+ hours of lecturing and tutoring international students within two editions of the International Expert Programme in Investigative and Legal Psychology. Topics: Applied Statistics, Machine Learning and Bayesian Networks.

Education

Åbo Akademi University, PhD in Psychology 2013 – present

Università di Torino, Master in Investigative Psychology 2011 – 2013
Grade: 110 cum laude/110

Università di Torino, Bachelor in Psychology 2007 – 2010
Grade: 110/110

Other relevant experiences and courses

- Data science projects on: Web Scraping and Data Pipelines; Predicting Stock Market; Analysing Cars Consumes.
- Courses in R and PostgreSQL (www.datacamp.com)
- Doing Research in the Human Sciences (Åbo Akademi University)
- Academic Communication and Effective Presentation Skills (Dopsy Symposium, 2 days)

Data Science Skills

Data Analysis:

- Regression (LM)
- Classification (GLM, KNN, LDA, QDA, NB)
- Feature selection procedures
- Cross validation methods
- Mediation Modelling
- Bayesian Networks
- Analysis of Variance (ANOVA)
- Principal Components Analysis (PCA)
- Common parametric tests
- Common non-parametric tests

Statistical software packages:

- R
- IBM SPSS statistics
- AgenaRisk
- OpenMarkov
- Excel

Databases:

- SQL (PostgreSQL)

Data manipulation and visualization:

- dplyr
- Tableau
- ggplot2

Languages
